* Actual downloads exceed WG&F sales data.

**Useable / Surveyed percentage is above 100% due to cross hunt area total sales and useable surveys summing to more than were sold for specific HA.

Note: Harvest estimates for limited quota licenses allowing antlered harvests are based off branch antlered bull harvests only while estimates for limited quota licenses allowing only antlerless harvests are based off adult antlerless harvests only. Harvest estimates for general licenses are based off branch antlered bull harvests only. The statewide harvest totals shown in Table I include all harvests.

Note: License level confidence intervals are based on estimated total license success rates (harvests / number sold).

Note: Success 90% margin of error was less than or equal to $\pm 10\%$ for 139 of 174 (80%) limited quota licenses where a non-census sample was taken. Success margin of error is not applicable (-) for the 91 limited quota licenses where all license holders were sampled (those limited quota license types with 50 or less licenses available, or where all license holders needed to be sampled to achieve the target number of usable survey responses). The number of usable surveys was at least 26% of sales for 8 of 25 elk general license strata.
