As always, we are indebted to the many sportspersons who completed a survey questionnaire and shared valuable information about their hunting experience.

## **Executive Summary**

Each year the Wyoming Game and Fish Department surveys elk hunters to estimate the number of animals harvested, hunter success, and hunter effort. This information helps Game and Fish manage elk populations and plan next year's hunting seasons. The harvest statistics presented in this report were estimated based on 23,168 responses to a voluntary harvest survey sent to hunters holding 68,918 licenses and extrapolated to represent the 81,445 total licenses issued. We estimate that 30,744 elk were harvested in Wyoming during the 2024 hunting season.

Note: The harvest estimates and associated confidence interval and success margin of error are for total bull harvest (branch-antlered and spike bulls) for licenses that allow bull harvest and cow harvest for licenses that do not allow bull harvest. The statewide grand total and type-level totals include harvest of branch-antlered bulls, spike bulls, cows, and calves.

Note: License level confidence intervals are based on estimated total license success rates (harvests / number sold).

Note: Success 90% margin of error was less than or equal to  $\pm 10\%$  for 127 of 132 (96%) limited quota licenses where a non-census sample was taken. The number of usable surveys was at least 26% of sales for 7 of 27 elk general license strata.
